

## G+Pro White Grease with PTFE

500ml

### Product Description

G + PRO White Grease with PTFE is a white, adhering spray grease in a spray can, based on lubricating greases. It is water-repellent and wear lagging, free from silicone and acid. The material thus extends the service life of the lubricant parts, even when exposed to higher pressure, impact to strain and vibratory stresses. White Grease with PTFE also exhibits excellent lubricating and corrosion protection characteristics. When used for hollow bodies or roll bearings the space must only be filled up to one third.

### Product Benefits

- \* Reduces wear in mechanical drives, gearwheels, chains and linkages
- \* White colour is suitable for use on visible parts which should not be lubricated with dark greases for optical reasons e.g seat rails, hinges etc.
- \* White colour gives a good indication of area of application and visible evidence of attention by technician
- \* Product has excellent durability and water-resisting properties
- \* Viscosity gives reduced wash-off and improved durability
- \* Additives and ingredients give excellent lubrication and enhanced slip properties offering superb performance in applications where surfaces rub-together under loading

### Product Usage

Use G + PRO White Grease with PTFE as a universal lubricant and protectant

### Directions for Use

- 1.Shake aerosol well before use
- 2.Clean area to be sprayed of all dirt, grime and water before use
- 3.Hold can 15-20 cm away

### Storage Instructions

This aerosol should be stored out of direct sunlight and below 50°C

### Shelf Life

Unopened 12 months, 6 months once opened

- Appearance** : White thickened liquid
- Odour** : Characteristic
